DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 21 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

This claim is found to be vague and indefinite because it refers to "the device", however, it is unclear as to which claimed element equates to "the device". Clarification is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8, 11-21, 24-30 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Malchesky U.S. patent No. 5,928,948.

Malchesky clearly teaches the provision of a simulated endoscope formed by a length of tubing (column 4, lines 1-14). A biofilm or soil (column 3, lines 17-30) is applied to the tubing and can be accompanied by an indicator dye (column 3, lines 41-48), a cleaning process is performed on the simulated endoscope and then a

Application/Control Number: 09/905,034

Art Unit: 1744

spectroscopic assessment is made of the efficacy of that process (column 4, line 2-through column 5, line 31).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 9-10 and 22-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Malchesky as applied above.

While Malchesky is silent as to the use of an indicator that binds a particular component or residual of the biofilm and placement of the indicator autonomously from the film, these are well known and expected sterilization indicators and placement techniques and it would have been well within the purview of one of ordinary skill in the art to use such techniques in conjunction with the simulated endoscope for their recognized efficacy.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Krisanne M. Thornton whose telephone number is 703-308-3914. The examiner can normally be reached on Mon.-Wed. 6:30am-4:00pm. On or about, December 16, 2003, the Examiner's office will be relocating and she can then be reached at (571)272-1279.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert J. Warden can be reached on 703-308-2920. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0661.
